OR DIGITAL EXPERIENCE AGENCY

APP INTEGRATION GUIDE

5 STEPS, 2 WEEKS FOR A SEAMLESS TRANSITION

1. CREATE A USER ACCOUNT

- Send a POST request to `/api/v3/users`.
- Include your email address, external user ID (xid), date of birth, preferred unit, and facility IDs in your request.
- You can also set a password at this stage, but it's optional — if you leave it out, the system will automatically generate one for you.

2. GET USER TOKEN

- After creating or logging in a user, you'll get a `userAccessToken` in the response. Use this token to authenticate the deep link.

3. CONSTRUCT THE DEEP LINK GET REQUEST

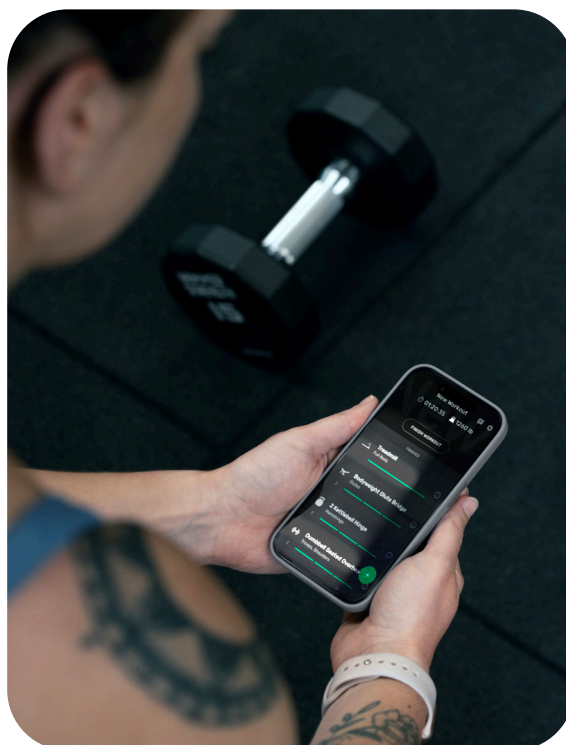

- Build a deep link using: `https://lfconnect.com/q?t=lfc&ut={user_token}&c={client_id}&ac={partner_identifier}`
- `t=lfc`: constant
- `ut`: `userAccessToken` from Step 2
- `c`: your `client_id` from the Developer Portal
- `ac`: your `partner_identifier` from the Developer Portal

4. HANDLE APP INSTALLATION/LAUNCH

- Clicking the deep link will automatically launch the Life Fitness app.
- If the app isn't installed, the user is redirected to the app store to download it.

5. AUTOMATIC LOGIN

- Launching the deep link automatically logs the user in for a seamless experience.

6. FULLY INTEGRATED

UPDATE USER PROFILE

Use `PUT /api/v3/users` to update an existing user's profile, including password, external ID (xid), and account status.

DELETE USER

Use `DELETE /api/v3/users` to remove a user from the Life Fitness system.

WORKOUT RESULTS BY GUID

Use `GET /api/v3/workout-results/lifefitness/{guid}` to fetch detailed workout results by Workout GUID.
